6008  
Trap Shrug/  
Lunge/Deadlift

6004  
Diverging Seated  
Vertical Row

6005  
Diverging  
Lat Pulldown

6011  
Unilateral  
Leg Extension/Curl

- UNILATERAL
- PLATE-LOADED
- BIOMECHANICALLY CORRECT
- RANGE LIMITERS
- SMALL FOOTPRINT
- MORE ADJUSTABILITY THAN THE COMPETITION
- AMERICAN MADE & TESTED
- MORE VERSATILITY THAN THE COMPETITION

The LeverEDGE line was designed from the outset to be biomechanically correct, with much time spent in prototyping and 3-D computer automated design to see that each piece's action mimics the natural movement of the user. From there, we added features that emphasized versatility while seeking to keep the machine as simple as possible to minimize cost and size yet maximize rigidity. The result is the marketplace's best value in the plate-loaded unilateral segment, and line of equipment that appeals to a broad spectrum of users and facility managers.

Visit [LegendFitness.com](http://LegendFitness.com) today to see more of the world's finest strength equipment, designed and built in America with **PASSION**.

# The **LEVEREDGE** Line of Plate-Loaded Devices

**6001**  
**Unilateral Converging**  
**SHOULDER PRESS**

Easily adjustable range limiters/  
starting height; integrated weight  
storage for 45-10lb plates.

**6002**  
**Unilateral Converging**  
**INCLINE CHEST PRESS**

Easily adjustable range limiters/  
starting height; integrated weight  
storage; long loading pegs.

**6003**  
**Unilateral Converging**  
**FLAT CHEST PRESS**

Easily adjustable range limiters;  
tournament-height bench; long  
loading pegs; weight storage.

**6004**  
**Unilateral Diverging**  
**SEATED VERTICAL ROW**

Accommodates wide range of  
user statures and limb lengths;  
integrated weight storage.

**6005**  
**Unilateral Diverging**  
**LAT PULLDOWN**

Ultra smooth, durable bearings;  
integrated weight storage;  
multiple grip options.

**6006**  
**Unilateral Converging**  
**WIDE CHEST PRESS**

Small footprint; smooth bearing  
action; long loading pegs can  
hold up to 9 plates on each lever.

**6007**  
**Unilateral Seated**  
**BICEP CURL**

The only unilateral bicep device  
with no cables, pulleys or straps  
for direct energy transfer.

**6008**  
**Unilateral TRAP SHRUG**  
**LUNGE/DEADLIFT**

Weight storage; long loading  
pegs; padded ankle rollers for  
single-leg exercises.

**6009**  
**Unilateral Diverging**  
**HIGH ROW**

Targets different part of the  
back; weight storage; long  
loading pegs; smooth bearings.

**6010**  
**Unilateral**  
**SEATED TRICEP PRESS**

Weight storage; long loading  
pegs; two-way seating for  
traditional and bench-style dips
