

LEGEND FITNESS®

LONG TWO-TIER HEX HEAD DUMBBELL RACK

(Part 3118)

The Long Two-Tier Hex Head Dumbbell Rack can hold up to 10 pairs of hex head dumbbells. It is fully welded for maximum durability, strength, and rigidity. The trays are constructed from quarter-inch thick angled steel and lined with ABS polymer wearguards to protect weights.

The Long Two-Tier Hex Head Dumbbell Rack is the ultimate rack for storing dumbbells. It is made of fully welded three-by-three inch tubing for extra stability. The two trays are lined with ABS plastic to protect dumbbells and to prevent chipping or scratching of the powder coat finish. The Long Two-Tier Hex Head Dumbbell Rack is sturdy, with a 32-inch lift-over height. There is no better dumbbell storage than a rack by Legend Fitness. Weights shown must be purchased separately.
