OLYMPIC PEG PLATEHOLDER

(Part 3193)

- Small footprint.
- Chrome-plated, Olympic-sized pegs.
- Fully welded.

The Olympic Peg Plateholder is very similar to our Plateholder. But instead of one-inch diameter weight pegs, this one has five chrome Olympic-size pegs. It is fully welded, so no assembly is needed. That also means that up to 600 pounds of plates won't make this thing wiggle it. Not even a little bit. Everything is contained within a space-conscious 18- by 18-inch footprint.

The Olympic Peg Plateholder is only available in our chip-resistant Silver Vein finish. Standard color choices are not available on this item.

58.1" L
68.2" W
