## PRO SERIES STEALTH LEG PRESS COMBO

Model: **7016**

### DESCRIPTION

The Stealth Leg Press can convert any rack or cage into a leg press. Hang it on the j-hooks, secure the safety straps, set the desired starting position, put an upright bench in front (sold separately) and suddenly your cage has learned a new trick.

This is an excellent solution for those that already have a cage or rack, but are limited in floor space for more leg exercises. But, the versatility doesn't end there, as this is the Pro Series version of the Stealth Leg press, offering additional functionality in also serving as a large step-up platform, as a plate-loaded kick back plate, and as a multi-function push/pull sled!

Comes fully optioned with safety web straps with quick release buckles, chrome-plated Olympic weight pegs, UHMW-layered rods that set the starting position, and more.

Also available as the 7015 Performance Series Stealth Leg Press
