

# LEGEND FITNESS®

## CHEST PRESS

(Part 900)

- 70° seat angle.
- Horizontal and neutral grip positions.
- Foot lever assist.
- Fully welded frame for maximum rigidity, strength and durability.
- Aviation-grade cabling.
- Glass-reinforced nylon pulleys prolong cable life.

### DESCRIPTION

Every now and then a piece of equipment comes by that grabs your attention. The pin select Chest Press from Legend Fitness is one of those pieces. Feature after feature elevate this Chest Press above all others, offering both simple use and greater functionality.

The unique 70-degree training angle is the real secret here, and your mid- and upper-chest muscles will take note. The ergonomically-angled grips offer both barbell and neutral positions for further targeting specific chest muscles. The foot-assist pre-stretch lever arm allows for easy starting and ending exercise positions.

Of course, like most Legend Fitness pieces, the Chest Press is fully welded for extra stability. The thickly padded, adjustable seat offers various starting positions so users of all heights can get an effective workout.

### WEIGHT STACK INFO

The Chest Press comes with 200-pound weight stack in 10-pound increments. If that's not enough, 250-pound and 300-pound weight stack upgrades (also in 10-pound increments) are available.
