TRICEP EXTENSION

(Part 910)

- Self-aligning handle.
- Adjustable seat back and pad with dense padding and top-stitched upholstery.
- Seat angle of 10°.
- Fully welded frame for maximum durability, rigidity and strength.
- Aviation-grade cabling.

DESCRIPTION

There is more to the Tricep Extension than meets the eye. Designed with correct biomechanics, total adjustability, and comfort in mind, when you work out on this, your triceps won't know what hit them! The self-aligning handle accommodates a wide range of arm lengths through full-range movements. The adjustable seat is angled 10° for extra stability. The frame uses fewer bolts than the competition, which means less flex during reps and less maintenance overall. The Tricep Extension boasts smooth movements start to finish thanks to aviation-grade cables and high-quality pulleys.

WEIGHT STACK INFO

The Tricep Extension comes with a 150 pound weight stack in 10-pound increments. If you need more weight, you can upgrade to a 200- or 250-pound stack, both in 10-pound increments.

50.5" L
28" W
74.25" H

500 lbs.
