

LEGEND FITNESS®

LEG EXTENSION

(Part 911)

- Seat back adjusts for user thigh length.
- Fully welded frame.
- Fully upholstered leg roller.
- Aviation-grade cabling.

DESCRIPTION

The selectorized Leg Extension machine delivers an intense workout, no doubt about it! When you lean back into the Leg Extension machine, you'll find yourself perfectly positioned thanks to the well-padded, adjustable back support and leg roller. The rubber-coated hand grips lock you in place and you're ready to feel the burn! The engineered cam delivers the precise load needed during the entire range of movement. An easy-access weight stack means you can step it up quickly between sets. Bottom line? The Leg Extension will take your quads to places they've never been.

WEIGHT STACK INFO

A 200-pound weight stack made up of 10-pound plates is standard on the Leg Extension. If you need more weight, 250-pound and 300-pound weight stack upgrades are also available. Upgrades also come in 10-pound increments.

71.5" L
36" W
74.25" H

522 lbs.
