

LEGEND FITNESS®

LEG CURL

(Part 912)

- Two-piece, 42.5-inch-long pad.
- Fully upholstered roller pad.
- Fully welded frame.
- Aviation-grade cabling.

DESCRIPTION

The Leg Curl machine offers the kind of performance that will keep you at the head of the class. A few reps on this will put things into perspective for sure! The Leg Curl offers an innovative design, a compact footprint, and an uncompromising commitment to detail make results a given. The thick padding makes it easy to focus on reps instead of discomfort, and the foam-coated grab handles keep you steady. The weight stack is easily accessible from the workout position, so changes between reps are quick. The Leg Curl puts the emphasis where it's supposed to be, so your hamstrings will be begging for mercy.

WEIGHT STACK INFO

The Leg Curl comes with a 150-pound weight stack in 10-pound increments. If you need more weight, you can upgrade to a 200-pound or 250-pound weight stack. Both upgrades come in 10-pound increments.

65" L
35" W
74.25" H

594 lbs.
