FABRIC OPTIONS

The below upholstery options are fabric, not vinyl, and must be cared for differently than the above vinyl options. While our fabric options are generally durable and easy to care for, the cleaning process is different. In most cases, wiping down with a damp cloth is sufficient. For tougher stains, a mild detergent and soft brush can be used to spot-clean fabric upholstery. When wet, fabric upholstery should be allowed to air dry naturally. For best results, items upholstered with fabric should be kept out of direct sunlight to prevent fading. For full cleaning instructions, visit www.legendfitness.com/equipment-cleaning-tips/
